

THE OFFER

MacroStack is a free-to-start nutrition app. MacroStack Pro is the paid upgrade for individuals who want barcode scanning, weight logging and trends, and progress analytics. Pro is offered in weekly, monthly, and annual billing options. This creator program focuses on Pro subscriptions, not Coach plans.

WHO TO SPEAK TO

People who track nutrition for training, fitness, or everyday consistency and want a simpler way to log food and understand progress.

WHAT TO MAKE

Create a short, authentic video in your own voice. Show a real MacroStack screen or workflow, explain one useful Pro benefit, and invite viewers to explore Pro at getmacrostack.com. Use your actual experience and avoid broad results claims.

01 Barcode scanning

Show how you scan a real food label and review its nutrition details in Pro.

02 A clearer progress picture

Show how Pro helps you review weight trends or nutrition consistency over time.

03 Why I use Pro

Start with a free food-logging workflow, then show the Pro feature you chose to add.

KEEP IT ACCURATE

Show features you have actually used. Say MacroStack is free to start and identify barcode scanning, weight tracking, and progress analytics as Pro features. Do not promise weight loss, medical outcomes, or results you cannot substantiate. Do not describe Coach tools as part of Pro.

Suggested call to action: "Explore MacroStack Pro at getmacrostack.com."
